

Team America Rocketry Challenge

Fun. Challenging. Rewarding. The chance to compete against the best. If you have the drive and determination to succeed, we have an exciting opportunity for you.

The Team America Rocketry Challenge is the first national model rocket competition for U.S. high school students. Five winning student teams will share a total prize pool of approximately **\$50,000** in savings bonds and their supervising teachers' departments will share **\$9,000** in cash.

We challenge you to design, build, and fly a multi-stage model rocket carrying two raw eggs and an electronic altimeter as close as possible to 1500 feet. The top 100 teams will compete in a fly-off in Northern Virginia in April 2003.

For more information and an application, visit
www.rocketcontest.org or **www.aia-aerospace.org**.

Sponsored by the Aerospace
Industries Association and the
National Association of
Rocketry.
